

Yehor Hrabovskyi

Backend-first Full-Stack Engineer

egorgrabovskij@gmail.com | github.com/Egoushka | hrabovskyi.online | Ukraine

SUMMARY

Backend-leaning full-stack developer with a focus on reliable .NET services, clean code, and operability. Comfortable owning features end to end and debugging distributed, job-driven systems in production.

CORE SKILLS

Languages: C# / .NET, TypeScript, SQL

Backend: ASP.NET Core, background jobs, PostgreSQL, REST APIs

Frontend: Angular

Infra: Docker, Caddy, Linux, Tailscale, Grafana, observability

EXPERIENCE

SowaLabs — Full-Stack Developer (backend-first)

2023 - present

- Backend services in .NET / ASP.NET Core for a crypto trading platform.
- Own features end to end: domain logic, persistence, background jobs, observability.
- Diagnose and fix production issues in distributed, job-driven systems.

GlobalLogic — .NET Bootcamp

- Transitioned from a C++ background into professional C# / .NET development.

SELECTED PROJECTS

MetaExchange - best-execution engine across multiple order books (.NET).

Jirify - CLI / automation for Jira issue workflows (.NET).

NetworkMonitor- host/network availability monitoring for a homelab (.NET).

HOMELAB

Single Hetzner VPS run like production: self-hosted Headscale/Tailscale, Caddy reverse proxy with automatic HTTPS, Vaultwarden, AdGuard, and a SOPS+age encrypted GitOps config repo.
